

BENJAMIN JIAHONG ZHANG

CURRENT POSITION	Postdoctoral Research Associate Division of Applied Mathematics, Brown University	
CONTACT INFORMATION	Division of Applied Mathematics 182 George Street, Room 310 Brown University Providence, RI 02912	Email: benjamin.zhang@brown.edu Website: benjzhang.github.io
EDUCATION	Massachusetts Institute of Technology , Cambridge, MA	02/2022
	<i>PhD, Computational Science and Engineering</i>	
	<ul style="list-style-type: none">• Thesis: <i>Efficient sampling methods of, by, and for stochastic dynamical systems</i>• Committee: Y. Marzouk, T. Sahai, T. Sapsis, K. Spiliopoulos	
	<i>SM, Aeronautics and Astronautics</i>	06/2017
	<ul style="list-style-type: none">• Thesis: <i>A Coupling Approach to Rare Event Simulation via Dynamic Importance Sampling</i>• Advisor: Y. Marzouk	
	University of California, Berkeley , Berkeley, CA	05/2015
	<i>BS, Engineering Physics</i>	
	<i>BA, Applied Mathematics</i> , Concentration in Numerical Analysis	
	<ul style="list-style-type: none">• Highest Honors in Applied Mathematics, Distinction in General Scholarship• Thesis: <i>A Computational Study of Seizure Attenuation via Anderson Localization</i>• Advisors: M.-R. Alam (Mechanical Engineering), P.-O. Persson (Mathematics)	
RESEARCH INTERESTS	Mathematics of machine learning, mathematics of generative modeling, mathematical control theory, rare event simulation, Bayesian computation	
RESEARCH EXPERIENCE	Division of Applied Mathematics, Brown University	Providence, RI
	<i>Postdoctoral Research Associate</i>	08/2024 - Present
	Continuation of AFOSR postdoc. Mentors: Paul Dupuis, Markos Katsoulakis, Luc Rey-Bellet	
	Department of Mathematics & Statistics, UMass Amherst	Amherst, MA
	<i>Postdoctoral Research Associate</i>	09/2022 - 07/2024
	AFOSR postdoc. Mentors: Markos Katsoulakis, Luc Rey-Bellet, Paul Dupuis	
	Department of Aeronautics and Astronautics, MIT	Cambridge, MA
	<i>Postdoctoral associate</i>	01/2022 - 08/2022
	<i>Research assistant</i>	09/2015 - 01/2022
	Supervised by Professor Youssef Marzouk in the Uncertainty Quantification group.	
	Department of Mechanical Engineering, UC Berkeley	Berkeley, CA
	<i>Undergraduate research assistant</i>	09/2013 - 08/2015
	Supervised by Professor Reza Alam.	
TEACHING EXPERIENCE	Division of Applied Mathematics, Brown University	Providence, RI
	<i>Co-instructor</i>	09/2024-12/2024
	Senior seminar: Introduction to Mathematical Machine Learning (APMA 1930Z).	
	Department of Mathematics and Statistics, UMass Amherst	Amherst, MA
	<i>Lecturer</i>	01/2024 - 05/2024
	Designed and delivered new course on Mathematical Machine Learning (MATH 590STA).	

Department of Aeronautics and Astronautics, MIT

Cambridge, MA

Course developer

12/2019 - 04/2020

Designed and co-wrote curriculum for MIT xPro online course on Modeling, Simulation, and Machine learning for working professionals.

Teaching assistant

01/2019 - 05/2019

Undergraduate probability & statistics for aerospace engineers (16.09). Awarded best teaching assistant award by the students.

Course developer and co-instructor

Spring 2018, 2019

Designed curriculum and co-taught course for 16.S685 “A hands-on introduction to computational engineering,” an introductory course targeted at first and second year undergraduates.

Seminar XL instructor

09/2018 - 05/2019

Lead small 18.03 (Differential Equations) study groups for first year URM students. Facilitated by the MIT Office of Minority education.

Teaching assistant and grader

09/2018 - 12/2018

Graduate class on numerical methods for stochastic processes and inference (16.940).

Subject Design Certificate Program

07/2020

From the MIT Teaching and Learning lab.

Department of Mathematics, UC Berkeley

Berkeley, CA

Teaching assistant

01/2015 - 05/2015

Second semester introductory calculus (Math 1B).

PROFESSIONAL
EXPERIENCE**United Technologies Research Center, UTC (Now Raytheon)**

Berkeley, CA

Research intern

06/2017 - 09/2017

Researched queuing systems for modeling human operators. Also investigated using quantum computing for optimization.

PUBLICATIONS

Journal articles

MENTORING

Master’s theses advised:

- Joshua W. (MIT AeroAstro) 2021 – 2022
Thesis: Rare event simulation via tensor-based approaches to stochastic optimal control

Undergraduate research students advised:

- Emily C. (UMass Amherst REU) 2024
- Hoang Son P. (UMass Amherst REU) 2024
- Ben B. (UMass Amherst REU, Honors Thesis) 2023 – 2024
- Alex R. (UMass Amherst REU) 2023
- Joshua W. (MIT UROP, SuperUROP) 2019 – 2021
- Karolina P. (MIT UROP) 2018 – 2019

AWARDS

SFB 1294 Data Assimilation Short-term Visiting Research Fellowship	2022
Mathworks Engineering Fellowship	2019
AIAA Teaching Assistant Award (Best TA selected by the MIT-AIAA Student chapter)	2019
NSF Graduate Research Fellowships Program Honorable Mention	2015, 2016
Phi Beta Kappa	2015
Summer Undergraduate Research Fellowship (SURF L&S)	2014
Tau Beta Pi Engineering Honor Society	2013
Matsui Center Cal-in-Sacramento Fellowship	2013

SERVICE

Organizer of the <i>Learning Learning Student Seminar</i>	2023 – 2024
Organizer of the Uncertainty Quantification Reading Group	2019 – 2021
ACDL Undergraduate Research Opportunity Coordinator (UROP)	2017 – 2021
Association of Computational Science and Engineering Students Co-President	2017 – 2018
• Organized the 2018 and 2019 MIT Center for Computational Engineering annual symposium	

Ad hoc paper reviewer: *SIAM/ASA Journal on Uncertainty Quantification*; *Probabilistic Engineering Mechanics*, *Stochastics and Partial Differential Equations*; *SIAM Journal on Scientific Computing* ; *Physica D: Nonlinear Phenomena*; *Symposium on Advances in Approximate Bayesian Inference*, *ICML 2023, 2024*; *I Can’t Believe It’s Not Better Workshop*, *NeurIPS 2023*; *Deep Generative Models for Health Workshop*, *NeurIPS 2023*

Minisymposium organization:

- JMM 2025, SIAM Special Session: *Mathematical perspectives of generative modeling* (10 talks)
- SIAM MDS 2024: *Foundations of Structure-exploiting Flow-based Generative Models* (4 talks)
- SIAM UQ 2024: *Optimal Transport for Uncertainty Quantification* (4 talks)
- SIAM UQ 2022: *Data-Driven Approaches to Rare and Extreme Events* (8 talks)
- SIAM CSE 2021: *Computational Dynamics meets Computational Statistics* (10 talks)
- SIAM CSE 2019: *Advances in Rare Event Simulation for Dynamical Systems* (8 talks)

INVITED TALKS &
SEMINARS

12. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. NYU Shanghai Frontiers Science Center of Artificial Intelligence and Deep Learning, November 16, 2023.
11. **B. Zhang**. A mean-field games laboratory for generative modeling. Computational and Data-enabled Science Seminar, Emory University, October 26, 2023.
10. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. Webinar on Mean-field games and machine learning, October 24, 2023.
9. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. Level Set Collective, UC Los Angeles, Los Angeles, CA, June 26, 2023.
8. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. SRI International, Menlo Park, CA, June 7, 2023.
7. **B. Zhang**. What is Bayesian computation? The What is... Graduate Seminar (TWIGS). UMass Amherst, Amherst MA, November 21, 2022.
6. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Novel perturbations for accelerating Langevin sampling. Applied Mathematics and Computation Seminar, UMass Amherst, Amherst MA, October 18, 2022.
5. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Transport map unadjusted Langevin algorithm. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, April 1, 2022.
4. **B. Zhang**, T. Sahai, and Y. Marzouk. A Koopman framework for sampling in stochastic dynamical systems. LIDS and Stats Tea Talk, MIT, Cambridge, MA, April 8, 2020.
3. **B. Zhang**, T. Sahai, and Y. Marzouk. A Koopman framework for sampling in stochastic dynamical systems. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, December 6, 2019.
2. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling methods for stochastic dynamical systems using Koopman eigenfunctions. United Technologies Research Center, Berkeley, CA, September 25, 2019.
1. N. Chandramoorthy, and **B. Zhang**. Koopman operators and the problems related to their computation. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, December 7, 2018.

CONFERENCE &
WORKSHOP
PRESENTATIONS

18. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling, 2024. SIAM Conference on Uncertainty Quantification, Trieste, Italy.
17. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling (poster), 2023. ICERM workshop on Optimal transport in Data Science, Providence, RI. (**Travel grant awarded**)
16. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Transport map unadjusted Langevin algorithm: analysis and connections, 2022. SIAM Conference on Mathematics of Data Science, San Diego, CA.
15. **B. Zhang**, Q. Long, J. White, T. Sahai, and Y. Marzouk. Data-driven rare event simulation for stochastic dynamical systems: A Koopman operator approach, 2022. SIAM Conference on Uncertainty Quantification, Atlanta, GA.
14. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems (poster), 2021. I Can't Believe It's Not Better Workshop, Neural Information Processing Systems Conference.
13. **B. Zhang**, J. White, T. Sahai, and Y. Marzouk. Rare event simulation for linear SDEs via multilevel splitting, 2021. SIAM Conference on Applications of Dynamical Systems, Portland, OR.
12. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems, 2021. SIAM Conference on Computational Science and Engineering, Austin, TX.
11. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems, 2020. Second symposium on machine learning and dynamical systems, Fields Institute.

10. **B. Zhang**, T. Sahai, and Y. Marzouk. Importance sampling for linear SDEs using eigenfunctions of the Ornstein-Uhlenbeck operator (poster), 2019. ICERM workshop on Mathematical Optimization of Systems Impacted by Rare, High-Impact Random Events, Providence, RI. (**Travel grant awarded**)
9. **B. Zhang**, T. Sahai, and Y. Marzouk. Rare event simulation in nonlinear dynamical systems via the Koopman operator, 2019. International Congress on Industrial and Applied Mathematics, Valencia, Spain.
8. **B. Zhang**, T. Sahai, and Y. Marzouk. Towards a generalized theory of rare event simulation for linear stochastic differential equations, 2019. SIAM Conference on Applications of Dynamical Systems, Snowbird, UT.
7. Q. Long, **B. Zhang**, Y. Marzouk, A. Gorodetsky, and T. Sahai. Tensor decomposition-based splitting methods for rare event simulation, 2019. SIAM Conference on Applications of Dynamical Systems, Snowbird, UT.
6. **B. Zhang**, T. Sahai, and Y. Marzouk. Efficient simulation of rare events in stochastic differential equations, 2019. SIAM Conference on Computational Science and Engineering, Spokane, WA.
5. **B. Zhang**, T. Sahai, and Y. Marzouk. Rare event simulation for dynamical systems in the presence of an attractor, 2018. SIAM Annual Meeting, Portland, OR.
4. **B. Zhang** and T. Sahai. A probabilistic analysis and rare event study of a dynamical queue for modeling human operators, 2018. SIAM Conference on Uncertainty Quantification, Garden Grove, CA.

1. **B. Zhang**, Y. Marzouk, and T. Sahai. Scalable methods for rare event simulation in rotorcraft systems, 2017. SIAM Conference on Computational Science and Engineering, Atlanta, GA.

WORKSHOPS
ATTENDED

11. Sampling, Inference, and Data-Driven Physical Modeling in Scientific Machine Learning, Institute for Pure and Applied Mathematics (IPAM), UCLA, Jan 13-17, 2025. (**Invited speaker**)
10. Random Dynamical Systems, with Applications in Biology, NSF-Simons National Institute for Mathematics and Theory in Biology, Nov 4-8, 2024.
9. Robust Optimization and Simulation of Complex Stochastic Systems, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, Sep 13-15, 2024.
8. Optimal Transport in Data Science, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, May 8-12, 2023.
7. Data Assimilation – Mathematical Foundation and Applications, Mathematisches Forschungsinstitut Oberwolfach (MFO, Oberwolfach Research Institute for Mathematics) , February 20-26, 2022.
6. “I Can’t Believe It’s Not Better” Workshop at the Neural Information Processing Systems Conference (NeurIPS) 2021, held virtually, December 13, 2021.
5. Second Symposium on Machine Learning and Dynamical Systems, Fields Institute for Research in Mathematical Sciences, University of Toronto, September 21-29, 2020.
4. Mathematical Optimization of Systems Impacted by Rare, High-Impact, Random Events, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, June 24-28, 2019.
3. Optimal Transport: Numerical Methods and Applications, Lake Como School of Advanced Studies, May 7-11, 2018.
2. USACM Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin TX, March 23-24, 2017.

1. Summer School in Monte Carlo Methods for Rare Events, Division of Applied Mathematics, Brown University, June 13-17, 2016.
