

EDUCATION	<p>Massachusetts Institute of Technology, Cambridge, MA Expected 2021</p> <p><i>PhD, Computational Science and Engineering</i></p> <ul style="list-style-type: none"> Thesis committee: Youssef Marzouk (Chair), Tuhin Sahai, Themis Sapsis <p><i>SM, Aeronautics and Astronautics</i> 2017</p> <ul style="list-style-type: none"> Thesis: <i>A Coupling Approach to Rare Event Simulation via Dynamic Importance Sampling</i> Advisor: Youssef Marzouk <p>University of California, Berkeley, Berkeley, CA 2015</p> <p><i>BS, Engineering Physics</i></p> <p><i>BA, Applied Mathematics</i>, Concentration in Numerical Analysis</p> <ul style="list-style-type: none"> Graduated Highest Honors in Applied Mathematics, Distinction in General Scholarship Thesis: <i>A Computational Study of Seizure Attenuation via Anderson Localization</i> Advisors: Mohammad-Reza Alam and Per-Olof Persson
RESEARCH INTERESTS	Rare event simulation, Monte Carlo methods, Computational dynamical systems, Data assimilation
RESEARCH EXPERIENCE	<p>Department of Aeronautics and Astronautics, MIT Cambridge, MA</p> <p><i>Graduate research assistant</i> 2015 - Present</p> <p>Supervised by Professor Youssef Marzouk in the Aerospace Computational Design Laboratory (ACDL). Currently studying importance sampling and multilevel splitting approaches for rare events in dynamical systems and Bayesian computation based on Koopman operator theory.</p> <p>Department of Mechanical Engineering, UC Berkeley Berkeley, CA</p> <p><i>Undergraduate research assistant</i> 2013 - 2015</p> <p>Supervised by Professor Reza Alam. Studied noninvasive seizure attenuation methods via Anderson localization. Also did experimental study of cavity dynamics of spheres entering fluid surfaces.</p>
TEACHING EXPERIENCE	<p>Department of Aeronautics and Astronautics, MIT Cambridge, MA</p> <p><i>Course developer</i> 2019 - 2020</p> <p>Designed and co-wrote curriculum for MIT xPro online course on Modeling, Simulation, and Machine learning for working professionals.</p> <p><i>Teaching assistant</i> Spring 2019</p> <p>Undergraduate probability & statistics for aerospace engineering. Awarded best teaching assistant award by the students.</p> <p><i>Course developer and co-instructor</i> Spring 2018, 2019</p> <p>Designed curriculum and co-taught course for “A hands-on introduction to computational engineering,” an introductory course targeted at first and second year undergraduates.</p> <p><i>Grader</i> Fall 2018</p> <p>Graduate class on numerical methods for stochastic processes and inference. Also served as informal teaching assistant and held office hours.</p> <p><i>Subject Design Certificate Program</i> Summer 2020</p> <p>Offered by the MIT Teaching and Learning lab.</p> <p>Department of Mathematics, UC Berkeley Berkeley, CA</p> <p><i>Grader</i> Summer 2015</p> <p>Upper division class on introduction to complex analysis.</p> <p><i>Teaching assistant</i> Spring 2015</p> <p>Second semester introductory calculus.</p>
PROFESSIONAL EXPERIENCE	<p>United Technologies Research Center, UTC Berkeley, CA</p>

Applied Mathematics Intern

Summer 2017

Researched queuing systems for modeling human operators. Also investigated using quantum computing for optimization.

California State Assembly

Sacramento, CA

Legislative Intern

Summer 2013

Analyzed policy and wrote briefs related to natural resources, environmental regulation, hydraulic fracturing, and services for the developmentally disabled. Responded to constituent affairs.

MENTORING

Undergraduate research students advised:

- Joshua W. (MIT UROP and SuperUROP) 2019 - 2021
- Karolina P. (MIT UROP) 2018 - 2019

HONORS

Mathworks Engineering Fellowship 2019
 AIAA Aeronautics & Astronautics Teaching Assistantship Award 2019
 NSF Graduate Research Fellowships Program Honorable Mention 2015, 2016
 Phi Beta Kappa 2015
 Summer Undergraduate Research Fellowship (SURF L&S) 2014
 Tau Beta Pi Engineering Honor Society 2013
 Matsui Center Cal-in-Sacramento Fellowship 2013

SERVICE

Organizer of the Uncertainty Quantification Reading Group 2019 - Present
 SIAM CSE 2021 Minisymposium organizer 2021
 Title: *Computational Dynamics meets Computational Statistics* (8 talks)
 Journal referee for SIAM Journal on Scientific Computing (SISC) 2021
 Journal referee for Physica D: Nonlinear Phenomena 2020
 SIAM CSE 2019 Minisymposium organizer 2019
 Title: *Advances in Rare Event Simulation for Complex Dynamical Systems* (8 talks)
 ACDL Undergraduate Research Opportunity Coordinator (UROP) 2017 - Present
 Seminar XL Instructor, MIT Office of Minority Education 2018 - 2019
 Association of Computational Science and Engineering Students Co-President 2017 - 2018

INVITED TALKS AND SEMINARS

4. **B. Zhang**, T. Sahai, and Y. Marzouk. A Koopman framework for sampling in stochastic dynamical systems. LIDS and Stats Tea Talk, Cambridge, MA, April 8, 2020.
3. **B. Zhang**, T. Sahai, and Y. Marzouk. A Koopman framework for sampling in stochastic dynamical systems. Aerospace Computational Design Laboratory Seminar, Cambridge MA, December 6, 2019.

2. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling methods for stochastic dynamical systems using Koopman eigenfunctions. United Technologies Research Center, Berkeley, CA, September 25, 2019.
1. N. Chandramoorthy, and **B. Zhang**. Koopman operators and the problems related to their computation. Aerospace Computational Design Laboratory Seminar, Cambridge MA, December 7, 2018.

CONFERENCE &
WORKSHOP
PRESENTATIONS

13. **B. Zhang**, J. White, T. Sahai, and Y. Marzouk. Rare event simulation for linear SDEs via multilevel splitting, 2021. SIAM Conference on Applications of Dynamical Systems, Portland, OR.
12. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems, 2021. SIAM Conference on Computational Science and Engineering, Austin, TX.
11. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems, 2020. Second symposium on machine learning and dynamical systems, Fields Institute.
10. **B. Zhang**, T. Sahai, and Y. Marzouk. Importance sampling for linear SDEs using eigenfunctions of the Ornstein-Uhlenbeck operator (poster), 2019. ICERM workshop on Mathematical Optimization of Systems Impacted by Rare, High-Impact Random Events, Providence, RI. (**Travel grant awarded**)
9. **B. Zhang**, T. Sahai, and Y. Marzouk. Rare event simulation in nonlinear dynamical systems via the Koopman operator, 2019. International Congress on Industrial and Applied Mathematics, Valencia, Spain.
8. **B. Zhang**, T. Sahai, and Y. Marzouk. Towards a generalized theory of rare event simulation for linear stochastic differential equations, 2019. SIAM Conference on Applications of Dynamical Systems, Snowbird, UT.
7. Q. Long, **B. Zhang**, Y. Marzouk, A. Gorodetsky, and T. Sahai. Tensor decomposition-based splitting methods for rare event simulation, 2019. SIAM Conference on Applications of Dynamical Systems, Snowbird, UT.
6. **B. Zhang**, T. Sahai, and Y. Marzouk. Efficient simulation of rare events in stochastic differential equations, 2019. SIAM Conference on Computational Science and Engineering, Spokane, WA.
5. **B. Zhang**, T. Sahai, and Y. Marzouk. Rare event simulation for dynamical systems in the presence of an attractor, 2018. SIAM Annual Meeting, Portland, OR.
4. **B. Zhang** and T. Sahai. A probabilistic analysis and rare event study of a dynamical queue for modeling human operators, 2018. SIAM Conference on Uncertainty Quantification, Garden Grove, CA.
3. **B. Zhang**, Y. Marzouk, B.-Y. Min, and T. Sahai. Rare event simulation of a rotorcraft system, 2018. AIAA Scitech Forum Non-deterministic Approaches Conference, Kissimmee, FL.
2. **B. Zhang**, Y. Marzouk, B.-Y. Min, and T. Sahai. Rare event simulation via dynamic importance sampling and measure transport (poster), 2017. USACM Thematic Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin, TX. (**Travel grant awarded**)
1. **B. Zhang**, Y. Marzouk, and T. Sahai. Scalable methods for rare event simulation in rotorcraft systems, 2017. SIAM Conference on Computational Science and Engineering, Atlanta, GA.

WORKSHOPS
ATTENDED

5. Second Symposium on Machine Learning and Dynamical Systems, Fields Institute for Research in Mathematical Sciences, University of Toronto, September 21-29, 2020.
4. Workshop on Mathematical Optimization of Systems Impacted by Rare, High-Impact, Random Events, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, June 24-28, 2019.
3. Optimal Transport: Numerical Methods and Applications, Lake Como School of Advanced Studies, May 7-11, 2018.
2. USACM Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin TX, March 23-24, 2017.

1. Summer School in Monte Carlo Methods for Rare Events, Division of Applied Mathematics, Brown University, June 13-17, 2016.
